

Vehicle Body Engineering by J Pawlowski The book was published in May 2011 and is 175 pages long. Popular topics in the areas of vehicle body engineering and construction include: stamping, welding, metal forming and rolling etc. This book will provide a guideline for engineers to build quality vehicles at a low cost. This eBook provides an introduction to the basics of automotive engineering with various design methods such as; stamping, welding, metal forming and rolling etc. The book is also designed in a systematic manner to make it easy for the readers to locate the various topics they want. The book highlights the various design methods used by automotive engineers in their designing process. In this book, there is a section on "Forming and casting of alloys", "Stamping and die-casting". This book is a very handy source of knowledge needed by both students and professionals in the field of automotive design.
